DETAILED ACTION

Response to Amendment

1. This Office Action is responsive to the Amendment filed 2/20/02.
2. The Amendment filed 2/20/02 successfully overcomes the objection and rejection set forth in paragraphs 1-2 of the Office Action dated 7/27/01. Accordingly, this rejection is withdrawn.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent No. 5,714,195 to Shiba et al. (Shiba) in view of U.S. Patent No. 6,035,526 to Saruta et al. (Saruta). Shiba discloses a method of repairing defects in a color filter comprising the steps of removing a portion of a filter element having a foreign substance therein by utilizing a laser beam, and discharging a hardening resin containing a dye or pigment onto the portion from which the foreign substance has been removed. See the abstract, column 11, line 61 to column 12, line 9, and Figures 10A-10D. However, Shiba does not teach applying the hardening resin by a needle painting method. Saruta discloses a method of repairing a defect in a color filter, wherein ink is

applied using a needle, and then hardened. See the abstract, column 5, lines 33-41, and column 7, lines 3-10. It would have been obvious to one skilled in the requisite art to apply the hardening ink using a needle, as taught by Saruta, in the process of Shiba because it is taught that applying ink with a needle allows for the ink to be provided in a slight amount, so that a proper amount of ink can be applied according to the size of the area required, without costing significant labor or time.

Allowable Subject Matter

4. Claims 2-4 are allowed.

Response to Arguments

5. Applicant's arguments with respect to claim 1 have been considered but are moot in view of the new ground(s) of rejection. Applicant argues that Shiba does not teach applying curable ink by a needle printing method, however Saruta disclose that the benefits of needle painting are known in the art, as set forth in the new rejection above.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 1756

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
